Reconstruction Finance Corporation Arizona Records

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

DEPARTMENT OF MINERAL RESOURCES
STATE OF ARIZONA
FIELD ENGINEERS REPORT

Granted

Mine **DAILY MINES CO., Cu. - WO₃**

Date **December 7, 1942**

District **Old Hat**

Engineer **Earl F. Hastings**

Subject: **Reconstruction Finance Corporation ✓
Preliminary Development Loan**

Docket No.

C-ND-Phx. 102

Date Application Received

November 20, 1942

Date of Field Examination

November 28, 1942

Date of Report

December 7, 1942

1. Name and address of applicant (correspondent):
Daily Mines Co., J. W. Daily, Vice President, P. O. Box 2086, Tucson, Arizona.
2. Character of project and estimated cost thereof:
Cu. - WO₃. Unwater and repair Daily Winzes No's. 1 and 2 and Daily shaft to make accessible unstopped areas below the Princess Tunnel level, \$5,000.00
3. Location of property:
Apache Camp, Old Hat Mining District, Pima County, Arizona.
4. Applicant's interest in or ownership of property:
Applicant is owning company.
5. Loan requested:
\$5000.00.
6. Loan recommended:
\$5000.00.
7. Comments:
 - (A) The mine has a production record of some 25000 tons of commercial ore mined from semi-leached areas.
 - (B) The Kemp report and samples indicate primary values in excess of those above the tunnel level will be exposed by the unwatering of the Daily Winze. Subsequent development is planned from the bottom of this winze to open up the hanging wall ore (heretofore mined above the tunnel level) as well as a foot-wall area represented by the Kemp samples of June 4, 1941. Much of this development will be in ore which can be milled during progress.
 - (C) Beneficiation facilities are available and the method has been proven in the past treatment of this ore, though no saving of WO₃ content is being made at this time.
 - (D) The verbal communication from a reliable geologist, engaged in making a private report, confirms much of the information contained in the docket and indicates the strong possibility of extension of this ore shoot. No limiting factor is in evidence, and the work proposed by the applicant appears logical in the light of this communication.

December 7, 1942

- (E) It is probable that an immediate and appreciable production will result from the expenditure of this loan and do so with minor requirements of critical material.
- (F) Added to the docket is a report by George A. Ballam, Field Engineer, Department of Mineral Resources, November 26, 1942.
